width 420mm
height 280mm
depth 30mm

← Size comparison = 145mm →

Battery operated, elegant wall clock in contemporary design easily blending into any environment.

Accurate quartz crystal controlled digital time display with bold digits for clear legibility over 40m. The 90mm high characters of the time display are suitable for extended viewing distances, like large rooms and long corridors. Ideal for offices, board rooms, corridors, reception areas, etc.

Elegant architectural finish with a silver metallic aluminium front panel. The display segments have a very high contrast and therefore provide for excellent legibility over a wide viewing angle in almost any ambient lighting conditions. As an option the front panel is also available in brushed stainless steel.

Easy, low cost installation anywhere in the building, on any wall, without the need to run cables.

- Battery operated
- Easy installation without cables
- Ultra high contrast display
- Large digits
- Excellent legibility over a wide viewing angle
- 12/24h programmable display
- User menu for manual setting
- Very low profile, elegant design
- Battery life approx. three years
- 'Low battery' indication
- Range of options
- Made in Germany

A wall clock for large rooms and long corridors. Suitable for public areas, receptions, hotel lobbies, chemist shops, retail environments, bank branches, offices, factories and despatch areas.
